Skills

Languages/Frameworks

- Playwright, Node.js, JavaScript, TypeScript, Python

Automation

- UI Testing, API Testing, Database Validation, Custom Reporting

Databases

- PostgreSQL, MongoDB

DevOps & Cloud

- GitHub, CI/CD, Docker
- AWS S3, EC2

Project Management & Methodologies

- Agile, ClickUp

Education

Bachelor Of Technology (B.tech)

Bapatla Engineering College, Bapatla
2020-2023 | CGPA 8.01
Electrical & Electronics Engineering (EEE)

Certifications

- AWS Certified Cloud Practitioner - AWS
- Node.js Certification - HackerRank
- JavaScript Certification - HackerRank
- Python Programming (Graduation) - PrepInsta
- Introduction to SQL Certification - Coursera
- Communication Skills Certification - TCS iON
- ClickUp Expert Certification & Verified Power User
- Accenture Data Analytics and Visualization Certification - Forage
- Cognizant Agile Methodology Certification - Forage

Languages Known

English, Hindi, Telugu

Career Objective

QA Automation Engineer with **2.4** years of experience in a product-based company. Specializing in building and maintaining end-to-end automation frameworks using **Playwright**, **TypeScript/JavaScript**, and **Node.js**, seamlessly incorporating these frameworks into **CI/CD pipelines**. Proficient in UI, API, and database testing. Passionate about making a meaningful contribution to a collaborative team.

Professional Experience

Associate Software Engineer at CareMonitor
Sydney, Australia (Remote) **May 2023 - Present**

- Designed and built automation frameworks from scratch using **Playwright**, **TypeScript**, and **Node.js**, covering UI, API, and database validation.
- Automated dynamic modules such as large forms, **authentication** flows, dialogs, and UI components like sliders, color ranges, and tables, ensuring accurate validations.
- Developed **end-to-end automation suites** for Care Plan and Alerts, covering form filling, data extraction, UI validation, and visual checks.
- Implemented automation for Care Plan, Programs and Appointment Scheduler, including real-time slot checks (API), booking validations, and multi-channel communication (emails, SMS, in-app, video/phone).
- Integrated test suites into **CI/CD pipelines** (**GitHub Actions**, Docker), enabling continuous regression testing and faster feedback.
- Performed API testing using Playwright and Postman, validating backend functionality and data consistency across environments.
- Reduced manual testing effort by **70%+**, improving release reliability and catching defects early in the **SDLC**.
- Supported functional and regression testing by designing test cases, managing test data, and maintaining structured QA documentation.
- Collaborated with developers and **product owners** in an Agile environment, actively contributing to code reviews, sprint planning, daily stand-ups, and **release calls**.

Projects

Tour Web Application (Natours) - Project Link

- A backend tour application with **RESTful APIs**, filtering, **JWT auth**, user management, and email integration (**AWS SES**).
- Implements security measures (**DDOS**, **XSS**, **brute force**) and **CI/CD** deployment via **Heroku**.

Recipe Web Application (Forkify) - Project Link: Project Link

- Recipe app using an external API with features like search, pagination, dynamic updates, bookmarks, and recipe uploads.
- Implemented local storage, AJAX and dynamic state management to enhance user experience. Deployed via **Netlify** CI/CD.
