PROFESSIONAL SUMMARY

SDET/QA Automation Engineer with **3+ years** of experience in product-based companies, building **end-to-end automation frameworks** from scratch using **Playwright**, **TypeScript/JavaScript**, and **Node.js**. Experienced in UI, API, and database testing, **CI/CD integration**, and cross-system validation. Leveraged AI tools to streamline test development and debugging.

SKILLS

Programming Languages & Frameworks: Node.js, JavaScript, TypeScript, Python.
Test Automation: Playwright, Page Object Model (POM), End-to-End Testing, Cross-Browser Testing, Test Reporting, Postman.
Databases: SQL, PostgreSQL, Google BigQuery, MongoDB.
DevOps & Cloud: Git**,** GitHub Actions, GitLab CI/CD, AWS (S3, EC2), Docker.
AI & Integrations: Claude, Cursor, MCP Servers, Salesforce.
Tools & Methodologies: Jira, ClickUp, Agile, Scrum, SDLC.

WORK EXPERIENCE

Interview Kickstart **Remote**
SDET II **Mar 2026 - Aug 2026**

- Designed and built **Playwright** automation frameworks using TypeScript and Node.js for 3 EdTech websites covering **300+ pages** and supporting a test suite of **1,000+** test cases.
- Developed a component-based **Page Object Model** with custom fixtures, a shared core, and a mapping layer.
- Implemented functional, end-to-end, and visual regression tests, executed in parallel across **9 browser and device combinations** to identify cross-browser and responsive issues. Reduced manual regression effort by **83%**.
- Automated **cross-system validation** across **Salesforce**, HubSpot, n8n, **BigQuery**, Gmail, and **AWS S3**, intercepting API requests to identify integration failures before release.
- Integrated automation suites into **GitLab CI/CD** pipelines for continuous regression runs with **Allure** reporting for failure analysis.
- Created custom skills and commands with **Claude**, **Cursor**, and **MCP** integrations (Playwright, Figma, Confluence) to speed up test development, debugging, and repetitive workflows.
- Owned the test lifecycle end to end and contributed to code reviews and knowledge-transfer sessions.

CareMonitor **Remote**
Associate Software Engineer (QA Automation) **May 2023 - Mar 2026**

- Built and maintained a Playwright automation framework **from scratch** using TypeScript and Node.js, with Page Object Model, custom fixtures, **reusable components**, and Excel/JSON-driven test data.
- Expanded automated regression coverage from 0% to approximately **70%** of modules, catching defects earlier in the **SDLC**.
- Automated multistep user journeys involving large forms, dynamic widgets, and real-time slot validation, reducing manual testing effort by 65%.
- Validated UI-triggered API requests using Playwright and Postman, verified submitted data in **PostgreSQL**, and tested role based access control with reused authenticated browser state.
- Configured **GitHub Actions** pipelines for test execution and implemented **Monocart** reporting for failure analysis.
- Collaborated with developers and product owners in Agile sprints, contributing to code reviews and release sign-offs.

EDUCATION

Bachelor of Technology **(B.Tech)** Electrical & Electronics Engineering
Bapatla Engineering College (**2020 - 2023**) **CGPA: 8.01**

PROJECTS

Natours: Tour Booking Web Application | Live Website: Built a **Node.js** application with **REST APIs**, **JWT** authentication. Implemented user management workflows, **AWS SES** integration, security measures, and CI/CD deployment.

Forkify: Recipe Web Application | Live Website: Developed an API-driven recipe app with search, pagination, bookmarks, recipe uploads, **AJAX**, local storage, and dynamic UI updates. Used Async JS and loading states for API driven workflows.

CERTIFICATIONS

- AWS Certified Cloud Practitioner - AWS
- Node.js Certification - HackerRank
- JavaScript Certification - HackerRank
- Introduction to SQL Certification - Coursera
